

Water-Based

x100
Water-Based
Au-25

Super Water-Repellent

Advanced Nano Coating
Super Concentrated 100

Advanced Nano Water Coating
Super Concentrated 100

for Vehicle Topcoat Coating, Glass Coating,
Interior Artificial Leather and Plastics
Coating, High-End Nano Coating
Automotive Aftercare.

Key Feature: Extreme High Concentration,
can be Diluted up to 100 Times.

To Use: After surface clean and dry, directly
spray on or apply with sponge, gently wipe
to shine with soft cloth. Direct Use or Dilute
with Pure Water 1-100 Times.

Recommend: Use after Au-26 or Au-27, to
foam a long-lasting glossy nano layer up
to 3 months.

Water-Based

Au-27

Super Water-Repellent

Advanced Nano Coating
Super Glossy Layer Emulsion

for Vehicle Topcoat Coating, High-End Nano
Coating Automotive Aftercare.

Key Feature: Super Glossy, Long-Lasting.
Emulsion Ready to Apply.

To Use: After surface clean, wet or dry, directly
apply or use with a sponge, gently wipe to shine
with soft cloth.

Complete formation of the nano structure is 1-3
hrs, depending on local environment. Glossy
Effect Last up to 3 months.

Recommend: After 3 hrs of structure formation,
apply Au-25 to provide even longer shine glossy
layer, effect up to 3 months.

Windshield, Glass, Concentrated 5

Advanced Nano Glass Coating &
Oil Removal Super Water-Repellent

Au-30 去油膜玻璃度膜 高濃縮 可稀釋5倍
用途: 可把油膜研磨掉, 或去除灰塵油污, 後續再上需要的產品,
可以加水稀釋5倍做玻璃除油膜膜

用法: 玻璃表面清潔後, 直接噴塗或滴數滴於海棉上均勻塗佈,
約一分鐘後以清水沖洗, 測試撥水效果, 可重複塗布, 儘量玻璃
請先小面积測試再刷是否會移動

Au-30 Advanced Nano Glass Coating & Oil Removal Super
Water-Repellent, Concentrated 5Form a super water-repellent
nano glass coating layer and also remove the oil from the glass
surface at the same time, providing clear view during raining day.

Key Features: Can be diluted up to 5 times with water.

Long-Lasting Effect. Easy to Apply. Note that different types of
wipers may affect the smoothness of the operation. Please
check the wiper operation before use.

To use: Wash and clean the glass surface with detergent
before use. Spray the Au-30 onto the glass surface and
wipe to shine in overlapping motion, then splash clean
water after 1 minute to test the results. Repeat again to
provide the best water-repellent effect. Use it under
shade. Apply every two weeks if necessary.
Keep in dry and cool place. Keep out of the reach of
children.

Au-31

Super Water-Repellent

Multi-Surface: Glass Metals, Non-Metals, Ceramic,
Artificial Leather, Plastic.

Advanced Nano Glass Coating &
Multi-Surfaces Long-Lasting Effect

Au-31 Advanced Nano Glass Coating & Multi-Surfaces
Long-Lasting Effect, Professional Use
Long-Lasting Effect Excellent High-End Nano Coatings
for glass, ceramics, stones, metals, non-metals,
advanced materials, hybrid composites, polyurea,
silicone, epoxy, acrylic, and industrial applications.

Key Feature:

- Excellent Multi-Surface Adhesion
- Excellent Temperature Resistant
- Excellent Thermal Barrier
- Excellent Wear and Abrasion Resistant
- Excellent Corrosion Resistant
- Excellent Water-Repellent
- Excellent Non-Fouling
- Excellent Anti-Graffiti
- Easy-to-Clean

More Applications:

- For Metals, Mold Releases
- For Ceramic Binders, Composites, Matrix, Fibers
- For Advanced Materials, Polyurea, Silicone, Epoxy,
Acrylic, Hybrid Composites
